

Limited Warranty

All of the materials used in making of our products are non-biodegradable plastics. As such they can be described as having an "indefinite lifespan". From a practical standpoint, we know that plastic pipe materials have been used in the ground for at least 45 years, and are still functioning.

Our plastic materials will not directly harm or help the vegetation grown within the CORE Landscape Products structure, from a horticultural standpoint. The purpose of our structure is to minimize soil compaction, allowing the plant root system to function properly.

CORE Landscape Products plastics can be exposed to limited sunlight, but, UV light does break down the chemical structure of our plastic. As such, topdressing (coverage with either gravel or soil) of the structure must be maintained. All of our products contain 'carbon black' (a UV inhibitor) to inhibit UV degradation. However, we will not be held responsible for long term effects of UV due to poor maintenance (i.e. no gravel or soil coverage).

Warranty Policy:

CORE Landscape Products warrants to its purchasers that all materials furnished by it will be free from defects in materials and/or workmanship. This warranty shall be extended for a period of five (5) years following the date of shipment by us. All defective materials shall be refurbished after inspection by our company showing the materials have failed under this warranty and providing a written claim is presented to us within the warranty period. Under this warranty, we agree to refurbish the defective materials at no charge. This, in lieu of all other warranties expressed or implied and is the sole warranty extended by us. Our liability under this warranty is limited to the refurbishing of materials and does not include any responsibility for consequential or other damages of any nature.
