Foundation Grid
below the wood deck.

Avoid the high cost of installing a concrete base for your hot tub

CORE Foundation Kits are ideal for a stable support base for your hot tub. Use two or more kits to provide a structural base for a beautiful floating deck surround.

Additionally, you can add an intimate privacy feature with one of the many decorative privacy screens in our collection.

CORE Foundation Kits are affordable, durable, stable, permeable, and DIY friendly.

CORE Hot Tub Foundation Kit

Once leveled the cells are filled with permeable aggregate.

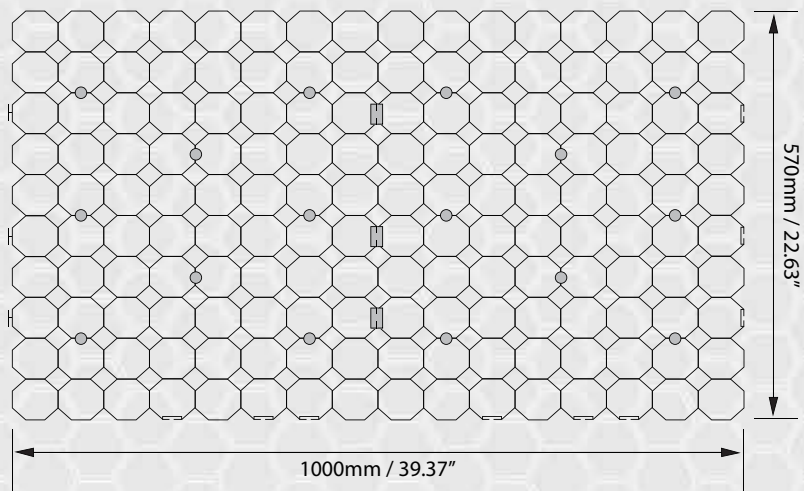

Your hot tub can be positioned directly on the hot tub foundation.

An option is to add an attractive wood surface on top of the hot tub foundation. Multiple Foundation Kits allow you to extend your deck area.

The Strength is in the aggregate filled CORE Foundation.

- The Hot Tub Foundation is backed with a geotextile layer for weed suppression.
- Load Bearing Capacity: 62,000 lbs./sq. ft. (> 300 tons/m²)
- Temperature Range: -45°C to +70°C
- UV and Chemical Resistance: Excellent
- Hot Tub Foundation Kits consist of 10 interlocking panels (39.37" x 22.63")
- Each Foundation Kit covers an area of 90.6" x 98.4" (62 sq. ft.)
