

Core Glow is proud to offer the best in sustainable, electricity-free photoluminescent lighting technology.

### PRODUCTS AVAILABLE\*

**Core Glow Commercial Grade Marble** is incredibly bright while maximizing value for large commercial grade projects.

**Colour:** Aqua, Blue or Green

**Size:** 1-3mm, 3-8mm and 8-15mm chips

By combining sizes you achieve the illusion of depth, just like looking at the night sky

\*Quantum glow is also available in 3-8mm and 8-15mm (~60% higher glow concentration)

### INSTALLATION TECHNIQUE | TOP DRESSING

You can press Core Glow Commercial Grade Marble into concrete and asphalt.

For asphalt surface:

1. Top Dressing: first install asphalt and do one pass with asphalt roller to level surface.
2. If large surface area, use a walk-behind drop spreader or hand-held spreader with a crank to scatter Core Glow stones in an even and random manner.
3. Pass over Core Glow installation area with asphalt roller to press Core Glow into the asphalt, ensuring smooth finished surface area.

**Important:** Do not use a pigmented asphalt sealer after installing Core Glow. Always add Core Glow as the last layer to maximize the brightness of the glow.

### SPECIAL NOTES

Requires 20 minutes of light for a full charge and will glow for 10+ hours (starting very bright and will slowly dim).

To keep the glow at full brightness, you can recharge every 1-2 hours.

Note: always order samples and do a small trial run of your Core Glow Installation prior to full installation. Thank you for choosing Core Glow!
